Subject: Application for Data Analyst / Industrial Automation Position

Dear Hiring Manager,

I am writing to express my keen interest in joining your team in a position related to industrial automation, data analysis, or SAP master data management. With hands-on experience as a SAP Master Data Analyst at Sumitomo Electric Bordnetze Tunisia and a strong background in industrial automation, I believe my skills and experience align well with the requirements of your organization.

Having earned both a **Brevet de Technicien Supérieur** in Industrial Automation and a **Brevet de Technicien Professionnel** in Industrial Maintenance from INTAC, I developed a strong technical foundation. During my internships and professional experiences, I designed and supervised automated systems using Siemens S7-1200 and TIA Portal, including the development of a degreasing bath system with real-time supervision via KTP700 panels.

At SEBN Tunisia, I contributed to the **MMA Mercedes project**, managing SAP master data and optimizing equipment performance. My ability to analyze, structure, and maintain critical data has helped ensure smooth and efficient operations within a complex production environment.

I am also proficient in several programming languages including **C, C++, Python, and Arduino**, and I possess solid experience in troubleshooting microprocessor-based circuits and automated systems.

I am motivated, detail-oriented, and constantly seeking to improve processes through data-driven insights and technological solutions. I am confident that my multidisciplinary background and adaptability make me a valuable asset for your team.

Thank you for considering my application. I look forward to the opportunity to contribute to your organization and would welcome the chance to discuss how I can support your team's objectives.

Sincerely,

Hani Ben Yaflah
